## Detailed Action

### Response to Applicant's Remark

1. Applicant's arguments (see remarks, filed October 3<sup>rd</sup>, 2005) with respect to the rejections of claims 6, 7, and 15 under 35 U.S.C. § 103 (a) have been fully considered and are persuasive. Therefore, the rejection of claims 6, 7, 9, 10, 12, 13 and 15 has been withdrawn. Examiner acknowledges the cancellation of claims 5, 8, 11 and 14.

### Allowance

2. Claims 6, 7, 9, 10, 12 13 and 15 are allowed. The following is an examiner's statement of reasons for allowance

In reference to claims 6, 7 and 15: *Cohen et al.* (U.S. Patent 5,621,654) teaches economically dispatching electrical power from power generation units (see *Cohen et al.*, Figs. 1-3 and column 3, lines 1-20). The system includes:

- A plurality of power generation units (see *Cohen et al.*, Fig. 1, Units 14);
- A common service centers are arranged and connected via communication networks (see *Cohen et al.*, Fig. 1, System Operation Processor, 18);

- Prepare the configuration of the power requirement for respective power generation units for every plurality of electric power generation based on the calculated power generation efficiency because the emission credit is used to find the lowest cost by comparing the rate curve for each generating unit (see Cohen et al., column 11, line 52 to column 12, line 3).

Cohen et al. does not teach that the system for aiding the preparation of operation and maintenance plans for a power generation installation where the efficiency is computed from the determined deviation value and cost relating to exchange of the machine and apparatus and the parts in the power generation unit.

The claimed invention includes all the features noted above and further includes a means for comparing between a cost of economical loss caused by a power generation efficiency reduction of the power generation unit calculated from the determined deviation value and cost relating the exchange of the machine and apparatus and the parts thereof in the concerned power generation unit.

The remaining claims are dependent upon claims 6 and 7 and contain further limitations.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays,

Art Unit: 2857

should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
